

# Gateways for Ethernet Controlled Networks

Remote control of Industrial networks via Ethernet

- Connecting Industrial Ethernet or Fieldbus networks with legacy TCP/IP host systems
- Gateway acting as controller to the industrial devices
- Comfortable commissioning via the Hilscher toolchain
- SIMATIC S7® programming adapter via TCP/IP network
- Ethernet MPI/DP/PPI Adapter SIMATIC S7®

EtherCAT®

PROFINET

PROFIBUS

EtherNet/IP™

DeviceNet

CANopen®

Serial

## Available formats

	netLINK 50-MPI	netTAP 50-MPI	netHOST
Dimensions (L x W x H)	65 × 48 × 16 mm	100 × 25 × 70 mm*	100 × 25 × 70 mm*
Protection class	IP 20	IP 20	IP 20
Mounting	Plug	DIN 60715 rail	DIN 60715 rail
Memory card	✗	✗	✓
USB Diagnostic port	✗	✗	✓

Note: All technical data may be changed without further notice.

# Gateways for Ethernet Controlled Networks

Connecting Industrial networks with legacy TCP/IP host systems

## Remote control of Industrial networks

- A simple TCP/IP based transport protocol transfers the services between the host system and the netHOST. For device integration a DLL for Windows and a ,C' source code for embedded solutions is provided.
- 100 bytes process data inputs and outputs are exchan-geable over the LAN network in about one millisecond.
- Two devices can be used to realize redundant appli-cations. Services are provided to execute a controlled switchover in the event one device fails or a line breaks.

## NHST 100

### SD-Card slot

- » Backup & Restore firmware and configuration

### Diagnostic port

- » Mini-USB
- » Protection cover

### Status LEDs

- » COM0, COM1
- » System status

### Network 1

- » 2-port Industrial Ethernet
- » 2-port Ethernet for LAN

### Network 2

- » 1-port Ethernet for LAN
- » Fieldbus

## Access to Siemens PLCs from multiple Ethernet host systems

## Access to Siemens PLCs

- Directly plugged on the SIMATIC S7® or as DIN rail mountable device
- The provided driver integrates into all well-known SIMATIC S7® engineering tools like STEP7® or TIA portal as PG/PC programming interface.
- Full PROFIBUS diagnostics and Master Class 2 DPV1 services enables unrestricted DP Slave device confi guration and parameterization in STEP7®.

## NT 50-MPI

### Rotary switches

- » Fieldbus Slave address of the MPI network

### Network 2

- » MPI/DP/PPI
- » Connection to MPI Bus and S7

### Status LEDs

- » COM0, COM1, RTE network
- » System status

### Network 1

- » 1-port Ethernet for LAN

## NL 50-MPI

### Network 2

- » MPI/DP/PPI
- » Connection to MPI Bus

### Network 1

- » 1-port Ethernet for LAN

### Network 2

- » MPI/DP/PPI
- » Connection to S7

## Gateways for Ethernet Controlled Networks

Product name	Main network	Part number	Protocol number								
			Sub network								
			MPI/DP/PPI	2) Industrial Ethernet	1) EtherCAT Master	1) Ethernet/IP Scanner	1) PROFINET Controller	1) CANopen Master	1) DeviceNet Master	1) PROFIBUS Master	
netLINK 50-MPI	Ethernet TCP/IP	1701.XXX	.430								
netTAP 50-MPI	Ethernet TCP/IP	1758.XXX	.111								
netHOST <sup>3)</sup>	Ethernet TCP/IP	1890.XXX		.800	.110	.820	.840	.500	.510	.410	

1) Preloaded with protocol firmware

2) Protocol firmware is loaded by customer

3) A Master license is always included
